LOVE YOUR NAILS

HOW DOES LYN'S CH2OLOR COMPLEX WORK?

Fingernails are made of keratin and continuous polish can stain and otherwise discolour the nail.

LYN lacquer is created from a revolutionary new formula known as Ch2olor Complex which creates a healthy, water and air permeable web of colour for vibrant long lasting results.

LYN's unique permeable formula allows water and air to seep through the lacquer onto the nail.

This revolutionary technology not only helps your nails breathe under varnish, it also keeps them clean and healthy.

Now you can enjoy long lasting vibrant colours for days without the harmful effects caused by regular nail polish.

Love Your Nails team has worked closely with an expert formulator based in France to create a revolutionary nail lacquer formula known as Ch2olor Complex. This formula allows for water and air to seep through the lacquer onto the nail providing high quality and quick drying nail enamel that is healthier than regular nail lacquer, diminishing chances of nail stains caused by lack of exposure to sun and air whilst keeping the same colour vibrancy. In addition to being the healthier option to regular nail polish, Love Your Nails is so that all women can experience beautifully painted and healthy nails.
